DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,5,7,9-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Sevalia et al(US 6,356,122).

The reference by Sevalia et al discloses a PLL, frequency synthesizer, see figure 2. where the PLL/frequency synthesizer with frequency compensation includes a

phase/frequency detector, with inputs from a reference divider(counter(/Q)) and programmable (continuous delay(DL1)), these forming the first input; the second input for the PFD is via the negative feedback comprising a discrete delay control (feedback counter(/P)) and which is coupled to another programmable delay(continuous delay (DL2)). The charge pump allows for the sourcing/sinking of current to the loop filter capacitor for developing the control voltage to the VCO. The output of the VCO is ultimately passed through the feedback arrangement of the feedback divider(/P) and DL2 for discrete and continuous delay action.

Allowable Subject Matter

Claims 4,6,8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
